

PROGRAM

Online conference 23/11/20 and 24/11/20

Project: “3D Printer, Technology for the Future “

Agreement Number: 2019-1-DE02-KA202-006346

Project in the frame of ERASMUS + PROGRAMME

- Objectives: what to be discussed ,what to be done.
- Completion of the Learning Module in order to be used as a face to face or distance learning material for the student’s training.(Every partner will present the first part of his responsibility topic .The teachers will present and discuss their work in order to achieve the best final version).
- Each partner will give just the titles of task examples (producing something with a 3d printer) from different sectors (at least 2 proposals by every partner).
- Learning Moodle platform
- Evaluate the program’s progress, share information exchange proposals and opinions to prepare the next step for the students’ training meeting.
